

# Cake Clicker Changelog - 0.2 (Auto Save)

## Notes

The first major update for Cake Clicker is here, v0.2 - The Auto Save Update! This update adds Auto Saving to the game so you don't have to restart each time you load up the game, right now you are unable to restart the game without doing a clean install but this will be sorted in a future patch.

As well as Auto Saving the standard Ariel Font has been removed and replaced with Kavoon Regular which is much more fitting for the whole vibe.

Thanks to anyone who continues to read these devlogs and please let me know about any issues you may discover.
